### **DETAILED ACTION**

This action is in response to the communication filed 6/28/2007. Claims 1-24 are pending.

#### ***Allowable Subject Matter***

Claims 1-24 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-24 are neither anticipated nor made obvious by the prior art of record.

In regard to claim 1, the prior art of record fails to disclose a module having a first substrate as set forth in combination with a second substrate comprised of electrical conductors and having a chip disposed thereon and an opening; an opaque layer surrounding the opening of the second substrate and coinciding with an edge of the opening, the opaque layer preventing light from entering the module through the second substrate, and means for preventing light from entering the module between the chip and the second substrate.

In regard to claim 14, the prior art of record fails to disclose a module having a first substrate as set forth in combination with a flexible substrate comprised of electrical conductors and having a chip disposed thereon and an opening; an opaque layer surrounding the opening of the flexible substrate and coinciding with an edge of the opening, the opaque layer preventing light from entering the module through the second substrate, and means for preventing light from entering the module between solder connection connecting the chip and the flexible substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

Applicant's arguments, see arguments, filed 6/28/2007, with respect to claims 1-24 have been fully considered and are persuasive.

### ***Conclusion***
